

FED-STD-595 colors are preferred due to broad usage, however, we do match suitable color chips in any color.

The following list indicates our current stock colors. For surface finish, precede the color code (shown as [] brackets) with G (Gloss), S (Semi-gloss), or L (Lusterless). FED-STD-595 lists the 10,000 series as gloss (G), 20,000 series as semi-gloss (S), and 30,000 series as lusterless (L).

Status of colors shown are either Active (A) or Reserved (R). Active colors are in stock and available for production, and reserved colors have been defined, but no order has been placed.
